allnewsweb.com — On January 19 of this year Adam Maksimov (photo below) of the town of Jamoltowek in Poland, near the border with The Czech Republic, saw something he will never forget. Sometime after midnight he went outside to charge his car battery. He was interrupted by a deafening noise which he likened to rockets blasting off. Then he heard a buzzing sound which he compared to that of a swarm of bees. The noises were followed by silence and then noise and then silence again.
